Coco Chong

Multimedia & UI/UX Designer

Hi!

I'm **Coco Chong**, a **25-year-old multimedia designer** born at Negeri Sembilan, Malaysia. With a background in both Fine Arts and Multimedia Design, I've developed a deep appreciation for expressive color, emotional storytelling, and artistic diversity. I love blending the emotion and texture of traditional art with the structure and interactivity of design. Through my work, I aim to create visuals that not only look beautiful – but feel meaningful.

EDUCATION

2023 - 2026

BA (Hons) in Multimedia Design
SEGi University, Kota Damansara,
Malaysia
CGPA: 3.81
Dean's List: 2 semesters

2019 - 2022

Diploma in Fine Arts
The One Academy, Bandar Sunway,
Malaysia
CGPA: 3.67

EXPERIENCE

Jan 2026 - Apr 2026

Graphic Design Intern
INCUBASE Studio Malaysia Sdn. Bhd.

2025

Group Exhibition "Infinite"
Paradigm Mall, Petaling Jaya, Malaysia

2022

Group Exhibition "Message"
The One Academy, Bandar Sunway, Malaysia

2022

Group Exhibition "A Tribute to Life"
FGS Dong Zen Temple, Jenjarom, Malaysia

The Velvet Brew

Adobe Ai

The Velvet Brew is a cozy library cafe that brings together two comforting things – warm drinks and good stories. Inspired by vintage bookshops and fantasy worlds, it’s a place where people can relax, read, and enjoy handcrafted tea or coffee.

Whispering Cats

Adobe Ps

Godot

Genre: Casual • Clicker • Relaxation Game
Platform: Mobile Game

Whispering Cats is a cozy clicker game designed to promote calmness and emotional well-being. Built around the concept of mindfulness and gentle discovery, the game invites players to interact with and collect unique cats – each symbolizing a different aspect of mental health and self-care.

Through soothing visuals, soft ambient sound, and relaxing gameplay, players gradually learn simple mental health insights as they unlock new feline companions. Each cat comes with its own personality, story, and “whisper” – a small piece of reflection or advice that connects emotional healing with everyday kindness and awareness.

[Download APK](#)

**This is just a prototype, not a complete game. Some game functions are unusable.*

Gameplay & Key Features

The game was inspired by the UN’s Sustainable Development Goal 3: Good Health and Well-being, with the goal of raising mental health awareness in a gentle, accessible way. Rather than presenting clinical information, Whispering Cats integrates emotional learning into small, comforting interactions – encouraging players to take breaks, breathe, and care for themselves.

Gamplay video can be watched [Here](#).

Level up Progress

Unlock cats and furnitures as player level up.

Gameplay

Whispering Cats combines simple clicker mechanics with gentle storytelling. Players earn affection by tapping and interacting with cats, which can then be used to unlock new feline companions, upgrades, and decorations.

Each time a new cat is discovered, players unlock a short story and a “Whisper” – a piece of mental health insight or self-care reminder tied to the cat’s personality. Over time, these collected Whispers form a gentle guide to emotional well-being.

Logo Redesign & Visual Identity

Adobe Ai

This project explores a new visual identity for The Coffee Bean & Tea Leaf, attempting to modernize the brand while keeping its legacy and warmth. The redesign features an updated logo, a new color palette, a pattern system, and product mockups to represent a more youthful, artisanal aesthetic.

SCAMPER Exploration

To reimagine The Coffee Bean & Tea Leaf’s identity, I used the SCAMPER method to explore variations based on substitution, combination, adaptation, and more.

Original Logo

Substitute:

Replaced circle with coffee cup shape, adjusted text layout.

Combine:

Merged substitute and adapt together

Adapt:

Combined coffee bean and tea leaf together and redesigned it.

Modify:

Made the circle element into a top view of a coffee cup

Put to Use:

Alternate side-view cup showing bean/ leaf as growing seed.

Eliminate:

Simplified icon by merging bean & leaf into one clean shape.

Reverse:

Changed the brand name into the main element.

Final Logo & Logo Variations

Adobe Ai

This redesigned logo brings a modern twist to the brand’s classic identity, focusing on simplicity, clarity, and balance. Swirling coffee icon combined with line art gives the logo a fresh, modern feel while maintaining brand recognition. Droplet details emphasize the drink element, adding movement and a sense of freshness. “Est. 1963” anchors the logo in legacy, creating a bridge between past and present.

Final Outcome

Sustainable Packaging Design

Adobe Ps

This project reimagines the packaging for Kojie-san soap with a focus on eco-friendly materials, and multi-functionality. The original packaging relied on single-use plastic and non-reusable cardboard, which are harmful to the environment.

The new design introduces:
A mesh pouch made from recycled and biodegradable materials, functioning as both primary packaging and a usable bath accessory (body scrub or laundry bag).

A bamboo box for secondary packaging that protects the soap from damage and moisture. The box is coated with beeswax for water resistance and features woodburned branding to reduce ink use and improve sustainability.

This redesign not only reduces waste but also adds value to the user experience, aligning with modern eco-conscious consumer values.

Character Design for Fantasy Narrative Game

Adobe Ps

This project explores character design and narrative worldbuilding for a game concept set in a half-fantasy world inspired by Victorian era. The story centers around the Netherworld, an organisation-like realm responsible for managing the souls. The project focuses on character exploration, visual styling, and integrating worldbuilding elements into the design.

Name: Minos

Age: 16 (at time of death)

Role: Netherrunner

Personality: Reserved, observant, dutiful

Background:

After an untimely death, Minos is recruited into the Netherworld due to his unusually high spiritual sensitivity. As a Netherrunner, he delivers crucial documents between departments using short-distance portals. The job is dangerous, and portals cause physical strain, but Minos always kept quiet of his pain.

World Concept: The Netherworld System

The Netherworld have a structured afterlife system operating like a large organisation with different departments:

- **Recruiter :**

They are tasked with finding newly deceased humans with high spiritual energy

- **Librarian :**

In charge of organizing soul information and compiling lists to deliver to the Grim Reapers

- **Netherrunner :**

Responsible for delivering the name lists from the Librarians to the Grim Reapers via portals.

- **Grim Reaper :**

A Grim Reaper operates as a pair. It consists of a Soul Guider, who is responsible for guiding good souls, and a Soul Reaper, who is in charge of dealing with evil souls.

Message - Graduation Exhibition Design

Adobe Id

Message was a Fine Arts graduation exhibition held during the post-pandemic recovery period. As part of the exhibition team, I was involved in designing the event’s visual identity, including the poster, invitation card, and exhibition catalogue. The exhibition featured works from three artists – each exploring personal themes shaped by isolation and the desire to reconnect with the world.

Menu Design

Adobe Id

This project features a cocktail menu design titled Midnight Elixirs, created to reflect the elegance and sensory experience of a modern lounge or upscale bar. The design combines soft gradients, curvy lines, and calligraphic typography to evoke a sense of warmth, refinement, and late-night charm.

Booklet Design

Adobe Id

This travel booklet project highlights the scenic beauty and cultural diversity of Hokkaido, Japan, across the four seasons. The design mixes elegant text, and gentle gradients to capture the region’s serene, nature-filled ambiance. Each section, divided by season (spring, summer, autumn, and winter), includes renowned destinations, local activities, and must-try regional cuisine.

Motion Graphic MV

Adobe Ae

This project is a motion graphic music video inspired by the song "Somebody That I Used to Know" by Gotye. The animation explores themes of heartbreak, and detachment through a combination of minimalist visuals, synced transitions, and lyrical motion.

You can watch the video [Here](#).
